

Problem sheet 4 note, Topics in fluids.

I'm sorry it took so long to write out the answers (which are online now); in doing so it transpired that some corrections were necessary. In questions 2, 4, 5, these are at the level of typographical errors; in question 6, a re-working of the algebra suggests algebraic modifications in the last three displayed formulae, and the written answers reflect that. But I certainly wouldn't want to swear that all the algebra is definitely correct. The modified problem sheet is also online.
