

## C4.3 consultation session 3, 19th May 2021

As I've received no further suggestions in the past week, I will cover the questions we didn't get round to in previous weeks:

- Q1c from the 2017 paper
- Q2b from the 2015 paper
- An extension of Q3b from the 2014 paper I mentioned last week (i.e. how much can we weaken the integrability assumption on  $c$ ?)

Let me know if you have any questions you'd like covered in the final session next week! Many thanks,

Jonah
