

# C4.1 Further Functional Analysis — Admin

Stuart White

University of Oxford  
Michaelmas Term 2020\*

## Office Hours

- C.4.1 office drop in times will take place from 11:15 to 12:00 on fridays throughout MT by Microsoft teams. A link to the meeting can be found through the part C / OMMS lectures team.
- Feel free to just turn up; though if you can only make later in the meeting, please drop me an email in advance. I won't stay in the meeting past about 11:30 after the last student has left, unless someone has told me they plan to come later.
- In general you'll get better answers to questions if you drop me a line in advance; you might be asking about a video I filmed ages ago (whereas normally questions after the lecture are on the lecture I've just given).
- I'd prefer to avoid discussing the example sheets in the office hours, and use these for questions about the material more generally, including the lectures, and pretty much everything except the example sheets!

## DPhil broadening

- Normally I'd do DPhil broadening by means of mini projects, but this year it's been put to me that it might be better to meet virtually a few times during the course, to discuss things, and make the broadening assessment a subset of the extension exercises for the course.
- Can you let me know say by wednesday of week 3 if you're planning to do this course for broadening.
