

Random Matrix Theory (C7.7) – Course Structure

The lectures for this course are labelled RMT n . m .

Here n denotes the week it is suggested the lecture should be viewed, and m denotes the order of the lectures that week.

So, for example, it is suggested that RMT4.3 is viewed in week 4, after RMT4.1 and RMT4.2 have been viewed.

The problem sheets are labelled week 2 (corresponding to material covered in weeks 1 and 2), week 4 (corresponding to material covered in weeks 3 and 4), etc.
